

July 31, 2026

Daiwa Securities Group Inc.

Report Regarding Consolidated Capital Adequacy Ratio
and Consolidated Leverage Ratio
Situation of Soundness in Management as of March 31, 2026

In accordance with the Financial Instruments and Exchange Act Article 57-17, “Notification, etc., of Documents Describing Status of Soundness in Management”, Daiwa Securities Group Inc. reports the situation of soundness in management as of March 31, 2026.

Table of Contents

Table of Contents	2
Key Metrics (at consolidated group level)	3
Composition of Capital Disclosure	4
Qualitative Disclosure (Consolidated)	7
1. Scope of consolidation.....	7
2. Overview of capital adequacy assessment methods	9
3. Overview of the risk characteristics, and the policies, procedures and structure of the Group-wide risk management	10
4. Credit risk.....	17
5. Overview of the risk characteristics and the policies, procedures and structure for Credit Risk Mitigation (hereunder CRM) techniques (excluding credit risk mitigation-related derivative and repo-style transactions).....	18
6. Overview of the risk characteristics and the policies, procedures and structure for the counterparty credit risk management of derivative and repo-style transactions (including CRM-related transactions).....	18
7. Securitization exposures.....	19
7-2. CVA risk.....	20
8. Market risk	21
9. Operational risk	23
10. Overview of the risk characteristics and the policies, procedures and structure for the exposure of the equities or instruments with equity-like characteristics stipulated in the provision of Article 43 Paragraph 2 of the Notification, which are subject to credit risk.....	24
11. Interest rate risk.....	24
12. Reconciliation of regulatory capital to balance sheet	25
13. Main sources of differences between regulatory exposure amounts and carrying values in financial statements	27
Quantitative Disclosure (Consolidated).....	28
1. List of the Group's subsidiaries applicable to "significant investments in the capital of banking, financial and insurance entities that are outside the scope of regulatory consolidation", the capital of which is less than the capital requirement, as well as the total amount of deficit.	28
2. Credit risk (excluding counterparty credit risk and securitization)	28
3. Amount of exposure by approaches for banks' equity investments in funds	30
4. Other quantitative disclosures.....	31
Consolidated Leverage Ratio	62
1. Composition of consolidated leverage ratio	62
2. Reasons for significant differences in the consolidated leverage ratio over previous year	64
Overview of Main Features of Regulatory Capital Instruments	65

Qualitative Disclosure (Consolidated)

1. Scope of consolidation

A). Discrepancy and the reason in the scope of consolidation defined under consolidated financial statements reported and that for consolidated capital adequacy ratio calculation under the provision of Article 3 of the Consolidated Capital Adequacy Ratio Notification published by Japan FSA(hereunder the Notification).

Subsidiaries defined in Ordinance for Enforcement of the Banking Act are included in the corporate group ("Daiwa Securities Group", hereunder the Group), which is equivalent to the scope of consolidated capital adequacy ratio calculation (the regulatory scope of consolidation). The regulatory scope of consolidation has a wider coverage than the scope of consolidation in the financial statements.

B). Number of consolidated subsidiaries, and company names and businesses of major consolidated subsidiaries

Number of consolidated subsidiaries: 138 companies

Major Consolidated Subsidiaries	Businesses
Daiwa Securities Co. Ltd.	Securities-related businesses
	Investment advisory and agency businesses
Daiwa Asset Management Co. Ltd.	Investment management businesses
	Investment advisory and agency businesses
Daiwa Institute of Research Ltd.	Information services
Daiwa Securities Business Center Co. Ltd.	Back office operations
Daiwa Facilities Co.,Ltd.	Lending and borrowing of real estate
	Management of real estate
Daiwa Next Bank, Ltd.	Banking businesses

There are no companies included under the scope of consolidation in the financial statements but not belonging to the Group.

E). Overview of the restrictions on the transfer of funds and regulatory capital within the Group companies

There is no specific restriction set forth regarding the transfer of funds and regulatory capital within the Group companies.

2. Overview of capital adequacy assessment methods

The Group sets forth “The Rules of Economic Capital Management” and “The Rules of Regulatory Capital Management”, and assesses capital adequacy from economic capital, regulatory capital, and stress testing points of view.

<Economic Capital>

The Group allocates economic capital for major Group companies within the risk appetite framework. The allocated amount takes into account the capital buffer reserved for stress events. Economic capital allocated toward major companies is decided based upon the historical risk amount, business plan/budget, and so on.

The Group computes group companies’ risk associated with businesses, and assesses its capital adequacy by confirming if such result falls within the range of allocated economic capital.

<Regulatory Capital>

The Group monitors regulatory capital against the alert level which is set well above the minimum regulatory capital ratio, and sets the alert level for internal management to evaluate the capital adequacy periodically.

<Stress Testing>

The Group uses the stress testing method to perform analysis on the impact on the soundness of the Group while in a stressed situation, validate the relevancy of plans from the angle of the economic capital and the regulatory capital. The experts and relevant departments conduct discussions on analyzing both the inside and outside environments to make multiple scenarios for the stress test.

3. Overview of the risk characteristics, and the policies, procedures and structure of the Group-wide risk management

The Group utilizes the risk appetite framework to strengthen risk governance from the management level.

Based on the characteristics of various risks held in business, the Group has established basic matters to manage risks appropriately. The risk management structure is established to ensure financial soundness and business adequacy.

<Risk Appetite Framework>

The risk appetite framework defines risk appetite as the type and total amount of risk that should be assumed in order to achieve the Group's business strategy. It is the framework of group-wide risk control.

The Group operates the risk appetite framework as described below.

(Overview of Risk Appetite Framework)

According to the liquidity, capital adequacy, concentration risk, and operational risk, as well as its business plan and risk characteristics, the Group adopts appropriate risk appetite metrics, sets the acceptable level of risk and the response plan in case of excess, and keeps conducting management and monitoring them.

The Group has facilitated documentation of the risk appetite statement for this framework, instilled a risk appetite culture in the Group and improved the level of business and risk management systems, as well as fostered a culture of risk management.

The Roles and Responsibilities in the Risk Appetite Framework

-Board of Directors-

Conduct deliberation and determination of risk appetite statements, which include quantitative indicators of risk appetite of the Group.

-Audit Committee-

Perform audit on execution of duties by the Board of Directors and management regarding the risk appetite framework.

-Group Risk Management Committee-

Conduct the Group's risk limits based upon the approved risk appetite.

In addition, properly grasp the status of risks including the situation of the risk management system and the risk limits violation of the group companies.

-CEO-

The CEO is responsible for the Group's overall management, which includes the group-wide business strategies, risk strategies and development and maintains the risk appetite framework.

-COO-

The COO has responsibility to assist the CEO's overall management which is based on the risk appetite framework.

-CFO-

The CFO is responsible for the Group's overall financial management which is based on the risk appetite framework.

-CRO-

Carry out development of the risk appetite statement and obtain board approval for the statement.

In addition, based on the statement, the CRO is responsible for the Group's overall risk management, which includes consolidating and monitoring the risk management system of each group company.

-CDO-

Based on the risk appetite framework, the CDO has responsibility to manage the overall data governance and the information system.

-Risk Management Department and compliance department of each group company-

As the second line of defense, based on the risk appetite, business size and risk characteristics, consolidate the risk limits for the company.

-Business department of each group company-

As the first line of defense, conduct autonomous risk management.

Detect exceeding of risk limits during daily business. Consolidate the appropriate system to perform countermeasure analysis and report to the Risk Management Department.

- Internal audit department-

As the third line of defense, conduct independent examination and evaluation for the Group's risk management framework. Consolidate an appropriate internal audit system to verify the effectiveness of the risk appetite framework.

(The operating structure of the risk appetite framework)

The Group's Board of Directors reviews the risk appetite statement on a semi-annual basis.

The risk appetite framework is also reviewed properly when business strategies or capital allocation plans are revised or the external environment changes significantly or great excess occurs on the risk profile.

<Risk characteristics and management policy, risk management system >

The Group is exposed to various risks in management. Of particular importance to the Group are the risks associated with its core securities business. Since the Group temporarily holds product positions for sale using its own account and offers products to customers, it is necessary to introduce liquidity risk including foreign currency, market risk resulting from market fluctuations, credit risk to trading partners and issuers, risk for which hedge does not function, operational risk that inevitably arises in executing business and model risk stemming from the use of decision-making models. The Group is also subject to investment risk due to deterioration in the business performance and credit status of investees, as well as to changes in the market environment, that coincide with the execution of growth investments. The Group conducts integrated risk management that measures the impact on capital and liquidity within the Group from a forward-looking perspective.

Based on the risk appetite framework, Daiwa Securities Group Inc. plays a central role in risk governance system consolidation from the integrated management perspective. The Group Risk Management Committee, which is a subcommittee of the Executive Committee of the Group, performs monitoring on the risk management system and the status of risks of the group companies, to strengthen the risk management of the entire group.

The contents of each Group Risk Management Committee meeting are reported to the Audit Committee.

In addition, based on the group-wide risk management and the approved risk appetite framework, the Group Risk Management Committee established the basic policy of risk management in the "Risk Management Regulations," which includes the following components:

(Basic policy of risk management)

1. Management's proactive involvement in risk management.
2. The structure of a risk management system that responds to features of the risks held by the Group.
3. Understand overall risk based on integrated risk management, secure strong capital and the soundness of liquidity.
4. Clarify the risk management process.

In addition, the group assigns the executive management and department to take charge of managing each risk.

(Definitions of Risks)

-Market risk-

Market risk refers to the risk of incurring losses due to market fluctuations, which affect the value of stock prices, interest rates, foreign exchange rates, and commodity prices, or due to the event of significant market liquidity declining, fluctuations occurring and a trade cannot be concluded or a trade is forced under a disadvantageous condition.

-Credit risk-

Credit risk refers to the risk of losses caused in cases where a counterparty of a trade or the issuer of a financial product held by the Group suffers a default, or credibility deteriorates. The credit risk of the Group's trading activities involves counterparty risk and issuer risk.

-Liquidity risk-

Liquidity risk refers to the risk of suffering losses due to cash management difficulties or having to finance at markedly higher costs than usual as a result of a change in market conditions or a deterioration of Group companies' finances.

-Operational risk-

Operational risk is the risk of losses that occur when internal processes, people, and systems do not perform adequately or do not function; it can also arise from external events.

- Model risk -

Model risk refers to the risk that the Group will suffer losses due to model development, implementation errors, or model misuse.

- Investment risk -

Investment risk refers to the risk that the value of the investment made by the Group will be damaged, that additional funding will be required, or that the return on investment will be lower than expected due to deterioration of the business performance and credit status of the investee changes in the market environment.

-Reputational risk-

Reputational risk refers to the possibility of the Group sustaining unforeseen losses and the Group's counterparties being adversely affected due to a deterioration of its reliability, reputation, and assessment caused by the spread of rumors or erroneous information.

-Accounting and tax risk-

Accounting and tax risk is the risk of not conducting appropriate accounting treatment and disclosure in accordance with accounting or taxation standards, laws, and regulations, or of not filing or paying taxes appropriately, as well as the risk of losses arising as a result.

Executive Management, department and committee (to deliberate and decide the policies and specific measures of risk management) in charge of each risk

Risk category	Executive management	Department	Committee
Market risk	CRO	Risk Management Department	Group Risk Management Committee
Credit risk	CRO	Risk Management Department	Group Risk Management Committee
Liquidity risk	CRO	Risk Management Department	Group Risk Management Committee
Operational risk	CRO	Risk Management Department	Group Risk Management Committee
Model risk	CRO	Risk Management Department	Group Risk Management Committee
Investment risk	CRO	Risk Management Department	Group Risk Management Committee
Reputational risk	Executive Managing Director of Corporate Communication Executive Officer responsible for Investor Relations Executive Managing Director of Compliance	Corporate Communication Department Investor Relations Office Compliance Control Department	Disclosure Committee
Accounting and tax risk	CFO	Finance Department	Group Risk Management Committee

(Three lines of defense)

In order to establish an effective risk governance system, the Group has established guidelines for the “three lines of defense” and consolidates the risk management framework based on them.

“Three lines of defense” is the concept of clarifying functions, roles and responsibilities in risk management and performing sound management. The first line is autonomous risk management. The second line is group-wide risk management. The third line is internal audit.

4. Credit risk

A). Overview of the risk characteristics and the policies, procedures and structure of risk management

The Group's credit risk consists of counterparty credit risk and issuer risk.

For counterparty credit risk, the Group assigns a credit limit to each counterparty group, and monitors regularly. Additionally, the Group measures the aggregated counterparty risk. The Group also monitors issuer risk related to the market instruments position held as a result of market making activities.

The Group conducts various activities including product offering, and asset management/investment, and due to this, exposure associated with various financial instruments as well as transactions occasionally concentrate toward a particular counterparty group. Because an unforeseen severe loss may be incurred as a result of credit deterioration of the particular counterparty group, the Group assigns credit limits on a cumulative exposure amount and monitors regularly.

The Group has a structure to appropriately control credit risk. The Group's risk management department measures the amount of credit risk exposure and reports to management daily. In addition, the risk management department also conducts the screening of business partners, setting of credit facilities, measuring the quantity of risk, monitoring of the credit risk situation and reporting to the Group risk management committee.

B). Overview of accounting allowance and write-off standards

In order to prepare for the loss from bad debts on loans and others, allowances are provided, based on the historical default rate for normal claims, and based on individually assessed amounts and cash flow estimation for doubtful and default loans.

The subsidiary bank classifies the normal claims by category, according to the "Practical Guidelines on Self-Assessment of Assets of Financial Institutions of Banks and Others and Impairment of Bankruptcy and Allowance for Doubtful Accounts" (JICPA Special Audit Committee for Banks and Other Financial Institutions Report No. 4 April 14, 2022), and records them on an expected loss ratio basis. Based on the self-assessment criteria of assets, the sales department and credit examination department conduct assessments for all claims.

C). Use of the External Credit Assessment Institutions (hereunder ECAIs) for determining the risk weight under the standardized approach

- Rating & Investment Information, Inc.
- Japan Credit Rating Agency, Ltd.
- Moody's Investors Service
- S&P Global Ratings

5. Overview of the risk characteristics and the policies, procedures and structure for Credit Risk Mitigation (hereunder CRM) techniques (excluding credit risk mitigation-related derivative and repo-style transactions)

A). Overview of the basic characteristics of policies, processes and the usage of netting

In securities-secured loans, loans are made up to the maximum borrowing amount within the market value of the securities received as collateral. After the execution of a loan, a netting agreement is conducted for the amount of the loan and the collateral valuation. Additional collateral is called in response to the deterioration of the ratio of the loan amount to the collateral value. Furthermore, collateral disposal is executed to protect loans when the deterioration is regarded as prolonged.

B). Overview of the basic characteristics of policies and processes of collateral evaluation and collateral management

Collateral is used for CRM techniques. Types of collateral are generally cash or high liquid securities. Eligible collateral type and collateral haircut rate are set in consideration of the creditworthiness and liquidity of each collateral.

The exposure amount and collateral value are, accordingly, calculated and compared daily.

C). Overview of the concentration of market risk and credit risk under applying CRM

Since price fluctuations occur with securities which are posted as collateral, assessment rates are evaluated by such volatility. In order to prevent concentration, for identical securities received from different business partners, an upper limit is set for the number of securities received.

6. Overview of the risk characteristics and the policies, procedures and structure for the counterparty credit risk management of derivative and repo-style transactions (including CRM-related transactions)

A). Policy on how to assign risk capital and credit limits for exposures to counterparties and central clearing houses

For derivative and repo-style transactions, a credit review of the counterparty is conducted in advance, and a credit limit is assigned when the credit soundness is confirmed. The exposure amount and collateral value are calculated and compared daily; accordingly, collateral is pledged or accepted. Likewise, for long settlement transactions, a credit review of the counterparty is required and the transaction can only be conducted if the credit limit is assigned.

B). Overview of the policies of collateral evaluation, collateral management and disposal procedures for collateral, guarantees and netting agreement

Collateral is used for CRM techniques. Types of collateral are generally cash or highly liquid securities. Eligible collateral type and collateral haircut rate are set in consideration of the creditworthiness and liquidity of each collateral. Received collateral is valued mark to market daily and monitored against exposures.

In the event that a business partner defaults, collateral will be sold in the market for claims protection.

For uncollateralized exposures, an allowance amount is calculated based upon the potential exposure calculated by simulation and the CDS spread observed in the market.

For derivative and repo-style transactions, bilateral netting agreements (ISDA Master Agreement, etc.) and collateral agreement (ISDA CSA, etc.) are generally set. For a transaction where a legally enforceable bilateral netting arrangement exists, CRM techniques are applied. The Group uses the Comprehensive Approach for CRM techniques.

C). Explanation of the impact caused by additional collateral needs to be posted due to the deterioration of the creditworthiness of the Group

Upon the time when its own credit rating is downgraded, additional collateral will be required. The Group carefully monitors the additional collateral amount and, accordingly, such amount falls into the allowable level.

7. Securitization exposures

A). Overview of the risk characteristics and the policies, procedures and structure for risk management

The Group is involved in securitization transactions generally as an investor, and, accordingly, holds securitization products under investment, banking and trading business. Securitization products include market risk, credit risk, as well as risks related to the assets, stratified/tranched structure and others. Outstanding exposures and credit soundness of securitization products are periodically monitored by independent risk control departments.

B). Overview of monitoring framework of the regulation set forth under the provision of Article 226 Paragraph 1(i)-(iv) of the Notification

Based on the regulations, periodical monitoring of securitization exposures is being conducted in order to adequately grasp comprehensive risk characteristics of securitization exposures including risk characteristics of underlying assets, performance-related information of underlying assets, and the scheme of the securitization transaction.

C). List of special purpose entities (hereunder SPEs) where the Group acts as the sponsor, indicating whether the Group consolidates the SPEs into its scope of regulatory consolidation, and affiliated entities that the Group manages or advises and that invest either in the securitization exposures that the Group has securitized or in SPEs that the Group sponsors

Not applicable.

D). List of entities to which the Group provides implicit support and the associated capital impact for each of them

Not applicable.

E). Accounting policy applied for the securitization transaction

The Group complies with Accounting Standard Board of Japan Statement No. 10, “Accounting Standard for Financial Instruments” in recognizing, evaluating, and booking the occurrence or extinguishment of financial assets or liabilities related to securitization transactions.

F). Names of ECAIs used for securitizations and the type of securitization exposures for which each agency is used

The following ECAIs are used in order to determine the risk weight for the securitization exposures.

- Rating & Investment Information, Inc.
- Japan Credit Rating Agency, Ltd.
- Moody’s Investors Service
- S&P Global Ratings

G). Overview of the process for implementing the Basel Internal Assessment Approach if applicable

Not applicable.

7-2. CVA risk

A). The name of the approach used to calculate the Credit Valuation Adjustment (hereunder CVA) risk amount (i.e., Standardized Approach for CVA (hereunder SA-CVA), Reduced Basic Approach for CVA (hereunder Reduced BA-CVA), Full Basic Approach for CVA), and overview of the transactions subject to calculation under each approach.

The group measures and manages the CVA for counterparty credit risk in derivative transactions. For derivative transactions where the CVA risk amount for financial accounting purposes is calculated using a CVA measurement model, the CVA risk is calculated using SA-CVA; for others, Reduced BA-CVA is used.

B). Overview of the characteristics of CVA risk and the risk management structure related to CVA (including the hedging policy for CVA risk and the system for continuously monitoring the effectiveness of hedging).

CVA is subject to volatility risk stemming from changes in counterparty creditworthiness and market fluctuations. Entities using SA-CVA establish a CVA desk to monitor volatility risk and control it through hedging operations.

C). Overview of the risk management structure related to CVA (including the involvement of Directors and other executives), and overview of the governance structure ensuring the effective functioning of the risk

management structure (including the status of documentation and reporting regarding CVA risk management, the involvement of the CVA exposure measurement model validation department, and the involvement of the internal audit department.)

As for the CVA risk management structure within the Group, the volatility risk of CVA is managed within the market risk management framework based on the Group's Risk Management Regulations. The risk management department and front office departments set and monitor limits such as loss limits, and the risk status is regularly reported to the CRO, Directors, and other executives through the Group Risk Management Committee and similar committee.

Regarding the CVA measurement model used for SA-CVA calculation, in addition to validation at the time of development and modification of the model, periodic validation is conducted at least once a year by a validation department independent of the model development department. Furthermore, the Internal Audit Department conducts audits of SA-CVA measurement and the CVA risk management structure at least once a year.

8. Market risk

A). Overview of risk management policies, procedures and structure

1. Methods for identifying, assessing, managing, and mitigating risks, as well as for monitoring hedge effectiveness

The Group provides market liquidity through the trading businesses and takes the market risk by holding the assets. The Group engages in hedging activities in order to control profit and loss fluctuations. Toward this end, as hedging activities may not properly work under stress circumstances, taking account of financial soundness, business plan/budget subject to hedging activities, and so on, limits are assigned aiming at the estimated loss computed in VaR (maximum loss anticipated at specified confidence level) and various stress tests fall within the Group's capital. In addition, limits are assigned toward positions, sensitivities, and others.

The trading departments conduct monitoring by calculating positions and sensitivities for the purpose of grasping the market risk. In addition, the risk management department monitors the group-wide market risk condition, and reports to management daily.

2. Policies and procedures for determining the scope of products to be classified into the trading book (including methods for identifying, managing, and monitoring illiquid positions)

In accordance with the Notification, products intended for purposes such as short-term resale or gaining profit from short-term price movements based on market rates or other indicators, as well as products designated for classification into the trading book, are classified into the trading book. (However, some products are classified into the banking book upon notification to the Commissioner of the Financial Services Agency.)

3. In the event of a transfer of products between the trading book and the banking book, the following

matters shall be disclosed:

- (i) The market value and gross fair value of the transferred products
- (ii) The reason for the transfer

The Group has not made any transfers of products between the trading book and the banking book.

4. Status of risk transfer by the internal trading desk

We do not have an internal trading desk.

B). The scope and content of reporting and measurement systems

In measuring the market risk amount, the Standardized Approach is applied to all products classified into the trading book, as well as to foreign exchange risk and commodity risk of products in the banking book.

9. Operational risk

A). Risk management policies and procedures

As the Group's business becomes more sophisticated, diversified, and systemized, various risks may potentially be incurred, and thus, the importance of operational risk management is becoming more important year by year. The Group's major group companies engage in the following framework in compliance with operational risk management rules, and adequately manage operational risk. In addition, due to the diversifying nature of its business, the Group also sets rigid rules concerning authority, automates office work processes to reduce human error, prepares business manuals, and takes other necessary measures. Each Group company strives to reduce operational risk according to the nature of its own business.

<Operational Risk Management Framework>

The Group adopts RCSA (Risk Control Self-Assessment) as the framework for operational risk management. RCSA is a process which includes the following components: employees have the obligation to identify, grasp, and evaluate themselves according to operational risk. According to analysis of the frequency and the impact of the risk, they evaluate and verify the effectiveness of risk mitigation measures. RCSA is conducted among major consolidated subsidiaries, and the results are reported at the Group Risk Management Meeting.

B). Methods for the calculating of BI

The Business Indicator (hereunder BI) is calculated based on the provision of Article 283 of the Notification, and comprises the interest, leases and dividend component (ILDC), the services component (SC), and the financial component (FC).

C). Methods for the calculating of ILM

For the calculation of the group's Internal Loss Multiplier (hereunder ILM), the group adopts the method stipulated in the provision of Article 284 Paragraph 1(i) of the Notification. However, for consolidated subsidiaries and similar entities that do not meet the criteria stipulated in the provision of Article 288 Paragraph 1 of the Notification, the group adopts the method stipulated in the provision of Article 284 Paragraph 1(iv) of the Notification, which uses a conservative estimate for ILM with a floor of 1.

D). For the calculation of the operational risk amount, whether any business divisions were excluded from the BI calculation (and if so, the reasons for such exclusion).

Not applicable.

E). For the calculation of the operational risk amount, whether any specific losses were excluded from the ILM calculation (and if so, the reasons for such exclusion).

Not applicable.

10. Overview of the risk characteristics and the policies, procedures and structure for the exposure of the equities or instruments with equity-like characteristics stipulated in the provision of Article 43 Paragraph 2 of the Notification, which are subject to credit risk

A). Structure of recognizing, assessing, measuring and reporting risks

In addition to trading businesses, the Group holds equities or instruments with equity-like characteristics for the purpose of trading business and banking business as well as business relation purposes. Because those financial instruments have distinct risk profiles for each product, the Group conducts adequate credit as well as market risk management including measurement of risk by the profile.

B). Risk management policy of subsidiaries' stock, affiliated companies' stock and other securities

For the consolidated subsidiaries, the scopes of risk management are assets and liabilities. For the affiliated companies, the scopes of risk management are equity exposures. These are subject to risk management in each classification.

C). Accounting policy of valuation of equity exposure

Marketable available-for-sale securities are stated at their fair values based on quoted market consolidated closing prices (the unrealized gain or loss is fully recognized, and the cost of products sold is mainly pursuant to the moving average method). Non-marketable available-for-sale securities (unlisted stocks, etc.) and partnership investment are carried at cost by the moving average method.

11. Interest rate risk

A). Overview of risk management policies and procedures

In the scope of market risk management, the Group calculates changes in Economic Value of Equity (hereunder EVE) and Net Interest Income (hereunder NII) to reflect the interest rate risk that arises from the non-trading transactions. The result is reported in the group's risk management meeting.

B). Overview of the method for measuring interest rate risk

For financial assets and financial liabilities owned by major subsidiaries and Daiwa Securities Group Inc., based on the shock scenario of interest rate fluctuation assuming certain stress every quarter, the Group computes changes in EVE and NII.

12. Reconciliation of regulatory capital to balance sheet
CC2 – Reconciliation of regulatory capital to balance sheet

2 Amount of "Subject to the securitization framework" excludes amount of "Subject to the market risk framework".

LI2: Main sources of differences between regulatory exposure amounts and carrying values in financial statements

(Millions of yen)

		Total	Items subject to:			
			Credit risk framework ¹	Counterparty credit risk framework	Securitization framework ²	Market risk framework
1	Asset carrying value amount under scope of regulatory consolidation (as per template LI1)	37,919,821	11,358,390	18,479,652	1,211,433	21,340,254
2	Liabilities carrying value amount under regulatory scope of consolidation (as per template LI1)	23,577,514	2,217	20,555,257	-	19,143,104
3	Total net amount under regulatory scope of consolidation	14,342,306	11,356,173	(2,075,605)	1,211,433	2,197,150
4	Off-balance sheet amounts	111,216	111,216	-	-	-
5	Differences due to derivatives transactions	2,134,595	-	2,134,595	-	-
6	Differences due to SFTs	4,895,723	-	4,895,723	-	-
7	Other differences	(1,678,327)	(285,091)	247,071	12,846	-
8	Exposure amounts considered for regulatory purposes	19,805,514	11,182,299	5,201,785	1,224,280	2,197,150

¹ Amount of "Subject to credit risk framework" excludes amounts of "Subject to counterparty credit risk framework" and "Subject to securitization framework".

² Amount of "Subject to securitization framework" excludes amount of "Subject to market risk framework".

(Note) Differences are mainly due to the following:

- Exposure of derivatives in the trading book is included in both counterparty credit risk and market risk after netting under certain conditions.
- Exposure of SFT assets is computed after netting with SFT liabilities under certain conditions.
- Some off-balance sheet items are included in credit risk.

		Components	BA-CVA capital requirements
1	Aggregation of systematic components of CVA risk	5,957	
2	Aggregation of idiosyncratic components of CVA risk	1,323	
3	Total		2,074

CVA3: The standardized approach for CVA (SA-CVA)

(Millions of yen)

		SA-CVA capital requirements	Number of counterparties
1	Interest rate risk	675	
2	Foreign exchange risk	620	
3	Reference credit spread risk	11	
4	Equity risk	34	
5	Commodity risk	-	
6	Counterparty credit spread risk	5,822	
7	Total	7,164	1,255

CVA4: Flow statements of CVA capital requirements

(Millions of yen)

	Previous reporting period end: March 2025 Current reporting period end: March 2026	CVA capital requirements
1	Total CVA capital requirements at end of previous reporting period	7,939
2	Total CVA capital requirements at end of reporting period	9,239
	Factor of variation	The increase in CVA capital requirements is due to the increase in Counterparty credit spread risk in SA-CVA.

OR1: Historical losses

(Millions of yen)

		March 2026	March 2025	March 2024	March 2023
Using ¥2,000,000 threshold					
1	Total amount of operational losses net of recoveries (no exclusions)	1,954	2,120	171	467
2	Total number of operational risk losses	178	28	25	34
3	Total amount of excluded operational risk losses	-	-	-	-
4	Total number of exclusions	-	-	-	-
5	Total amount of operational losses net of recoveries and net of excluded losses	1,954	2,120	171	467
Using ¥10,000,000 threshold					
6	Total amount of operational losses net of recoveries (no exclusions)	1,376	2,021	91	343
7	Total number of operational risk losses	50	9	5	9
8	Total amount of excluded operational risk losses	-	-	-	-
9	Total number of exclusions	-	-	-	-
10	Total amount of operational losses net of recoveries and net of excluded losses	1,376	2,021	91	343
Details of operational risk capital calculation					
11	Are losses used to calculate the ILM (yes/no)?	yes	yes	yes	yes
12	If "no" in row 11, is the exclusion of internal loss data due to non-compliance with the minimum loss data standards (yes/no)?	-	-	-	-

* 1 Conservative estimates are used for ILM as regards certain consolidated subsidiaries not meeting the standards stipulated in the Notification Regarding Capital Adequacy Ratio, Article 288-1 as of March 31, 2026

		March 2022	March 2021	March 2020	March 2019
Using ¥2,000,000 threshold					
1	Total amount of operational losses net of recoveries (no exclusions)	195	288	-	-
2	Total number of operational risk losses	30	37	-	-
3	Total amount of excluded operational risk losses	-	-	-	-
4	Total number of exclusions	-	-	-	-
5	Total amount of operational losses net of recoveries and net of excluded losses	195	288	-	-
Using ¥10,000,000 threshold					
6	Total amount of operational losses net of recoveries (no exclusions)	92	152	-	-
7	Total number of operational risk losses	3	5	-	-
8	Total amount of excluded operational risk losses	-	-	-	-
9	Total number of exclusions	-	-	-	-
10	Total amount of operational losses net of recoveries and net of excluded losses	92	152	-	-
Details of operational risk capital calculation					
11	Are losses used to calculate the ILM (yes/no)?	yes	yes	-	-
12	If "no" in row 11, is the exclusion of internal loss data due to non-compliance with the minimum loss data standards (yes/no)?	-	-	-	-

(Millions of yen)

		March 2018	March 2017	Ten-year average
Using ¥2,000,000 threshold				
1	Total amount of operational losses net of recoveries (no exclusions)	-	-	866
2	Total number of operational risk losses	-	-	55
3	Total amount of excluded operational risk losses	-	-	-
4	Total number of exclusions	-	-	-
5	Total amount of operational losses net of recoveries and net of excluded losses	-	-	866
Using ¥10,000,000 threshold				
6	Total amount of operational losses net of recoveries (no exclusions)	-	-	679
7	Total number of operational risk losses	-	-	13
8	Total amount of excluded operational risk losses	-	-	-
9	Total number of exclusions	-	-	-
10	Total amount of operational losses net of recoveries and net of excluded losses	-	-	679
Details of operational risk capital calculation				
11	Are losses used to calculate the ILM (yes/no)?	-	-	yes
12	If "no" in row 11, is the exclusion of internal loss data due to non-compliance with the minimum loss data standards (yes/no)?	-	-	-

OR2: Business indicator and subcomponents

(Millions of yen)

		March 2026	March 2025	March 2024
1	Interest, lease and dividend component	90,013		
2	Interest and lease income	1,709	4,319	4,342
3	Interest and lease expense	(19,510)	(19,937)	(17,837)
4	Interest earning assets	6,933,056	5,375,222	4,734,064
5	Dividend income	(688)	(1,943)	(2,098)
6	Services component	613,726		
7	Fee and commission income	2,533	3,713	8,962
8	Fee and commission expense	1,595,887	1,563,829	1,447,762
9	Other operating income	36,163	36,598	30,001
10	Other operating expense	496,964	434,738	360,590
11	Financial component	113,256		
12	Net P&L on the trading book	3,610,598	2,793,554	2,722,321
13	Net P&L on the banking book	654	994	791
14	BI	816,995		
15	Business indicator component (BIC)	117,181		
16	BI gross of excluded divested activities	816,995		
17	Reduction in BI due to excluded divested activities	-		

OR3: Minimum required operational risk capital

(Millions of yen)

1	Business indicator component (BIC)	117,181
2	Internal loss multiplier (ILM)	0.67
3	Minimum required operational risk capital (ORC)	78,798
4	Operational risk RWA	984,976

IRRBB1 : Quantitative information on IRRBB

(Millions of yen)

		ΔEVE	
		March 2026	March 2025
1	Parallel up	10,662	10,586
2	Parallel down	39,466	32,618
3	Steepener	6,687	4,711
4	Flattener	3,004	652
5	Short rate up	3,406	3,517
6	Short rate down	11,521	15,470
7	Maximum	39,466	32,618
		March 2026	March 2025
8	Tier 1 capital	1,618,172	1,540,625

ΔNII is not disclosed because there is only minimal impact from the changes in net income subject to the interest rate risk which occurs from the non-trading business.

CCyB1: Geographical distribution of credit exposures used in the countercyclical buffer

(Millions of yen)

Geographical breakdown	Countercyclical capital buffer rate	Risk-weighted assets used in the computation of the countercyclical buffer	Bank-specific countercyclical capital buffer rate	Countercyclical buffer amount
Australia	1.00%	125,876		
Belgium	1.00%	11,408		
France	1.00%	2,858		
Germany	0.75%	10,926		
Hong Kong SAR	0.50%	23,543		
Korea	1.00%	79,705		
Luxembourg	0.50%	24,510		
Netherlands	2.00%	24,507		
Spain	0.50%	0		
Sweden	2.00%	12		
United Kingdom	2.00%	109,067		
Sum		412,417		
Total		4,655,043	0.11%	9,021

* Basically, Risk-weighted assets used in the computation of the countercyclical capital buffer are calculated on an "ultimate risk" basis. For a part of assets which are difficult to allocate jurisdictions by the ultimate risk method, we adopt the jurisdictions which are recorded in the balance sheet to the calculation.

Consolidated Leverage Ratio

1. Composition of consolidated leverage ratio

LR1: Summary comparison of accounting assets vs leverage ratio exposure measure

(Millions of yen)

Basel III template number	Items	March 2026	March 2025
1	Total assets in the consolidated balance sheet statements	38,077,646	36,024,346
2	Total assets held by group companies which are not included in the scope of the consolidated leverage ratio (Δ)	-	-
3	Adjustment for securitized exposures that meet the operational requirements for the recognition of risk transference	-	-
4	Adjustments for temporary exemption of central bank reserves (Δ)	3,007,298	2,941,611
5	Adjustment for fiduciary assets recognized on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure (Δ)	-	-
6	Adjustments for regular-way purchases and sales of financial assets subject to trade date accounting	3,131	2,098
7	Adjustments for eligible cash pooling transactions	-	-
8	Adjustments for derivative financial instruments	(1,198,172)	(834,999)
8a	Total derivative exposures	3,282,751	2,027,709
8b	The accounting value of derivatives recognized as assets (Δ)	4,480,923	2,862,708
9	Adjustment for securities financing transactions (i.e., repurchase agreements and similar secured lending)	(1,986,814)	(3,235,859)
9a	Total exposures related to repo transactions, etc.	10,473,926	12,301,780
9b	The accounting value of the SFTs recognized as assets (Δ)	12,460,741	15,537,639
10	Off-balance sheet exposures	178,430	224,636
11	Adjustments for prudent valuation adjustments and specific and general provisions which have reduced Tier 1 capital (Δ)	-	-
12	Other adjustments	(361,417)	(379,401)
12a	Adjustments for Tier 1 capital (excluding specific and general provisions) (Δ)	293,349	258,567
12b	The amount of customers' liabilities for acceptances and guarantees (Δ)	-	-
12c	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	-	-
12d	Deductions of receivables assets for cash variation margin provided in derivatives transactions (Δ)	69,888	122,373
12e	Total assets held by group companies which are included in the scope of the consolidated leverage ratio (except for the assets included in the total assets in the consolidated balance sheet)	1,819	1,539
13	Total exposures	31,705,504	28,859,210

LR2: Leverage ratio common disclosure template

(Millions of yen, %)

Basel III template number	Items	March 2026	March 2025
On-balance sheet exposures (1)			
1	On-balance sheet items before adjustments	18,133,634	14,686,024
2	Receivables assets for cash variation margin provided in derivatives transactions	-	-
3	Deductions of receivables assets for cash variation margin provided in derivatives transactions (Δ)	69,888	122,373
4	Adjustments for securities received under securities financing transactions that are recognized as an asset (Δ)	-	-
5	Adjustments for Tier 1 capital (specific and general provisions) (Δ)	-	-
6	Adjustments for Tier 1 capital (excluding specific and general provisions) (Δ)	293,349	258,567
7	Total on-balance sheet exposures (excluding derivatives and SFTs) (A)	17,770,396	14,305,083
Derivative exposures (2)			
8	Replacement cost associated with all derivatives transactions (with the 1.4 alpha factor applied)	930,830	653,049
9	Add-on amounts for PFE associated with all derivatives transactions (with the 1.4 alpha factor applied)	1,368,096	474,127
10	Exempted central counterparty (CCP) leg of client-cleared trade exposures (Δ)		
11	Adjusted effective notional amount of written credit derivatives	4,579,531	3,852,960
12	Adjusted effective notional offsets and add-on deductions for written credit derivatives (Δ)	3,595,707	2,952,428
13	Total derivative exposures (B)	3,282,751	2,027,709
Securities financing transaction exposures (3)			
14	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	14,063,580	16,940,445
15	Netted amounts of cash payables and cash receivables of gross SFT assets (Δ)	3,973,627	4,999,723
16	CCR exposure for SFT assets	383,973	361,058
17	Agent transaction exposures		
18	Total securities financing transaction exposures (C)	10,473,926	12,301,780
Other off-balance sheet exposures (4)			
19	Off-balance sheet exposure at gross notional amount	570,085	672,350
20	Adjustment for conversion to credit equivalent amounts (Δ)	391,654	447,714
22	Off-balance sheet items (D)	178,430	224,636
Leverage ratio (5)			
23	Tier 1 capital (E)	1,618,172	1,540,625
24	Total exposures ((A)+(B)+(C)+(D)) (F)	31,705,504	28,859,210
25	Leverage ratio on a consolidated basis (E)/(F)	5.10%	5.33%
26	National minimum leverage ratio requirement	3.15%	3.15%
27	Applicable leverage buffers	-	-

(Millions of yen, %)

Basel III template number	Items	March 2026	March 2025
Leverage ratio (including amount of the central bank reserves) (6)			
	Total exposures (F)	31,705,504	28,859,210
	Amount of the central bank reserves	3,007,298	2,941,611

	Leverage ratio (including amount of the central bank reserves) (E) / (F')	4.66%	4.84%
Disclosure of mean values (7)			
28	Mean value of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables (G)+(H)	11,439,051	11,756,808
	Mean value of gross SFT assets (G)	14,127,670	15,096,236
	Mean value of netted amounts of cash payables and cash receivables of gross SFT assets (Δ) (H)	2,688,619	3,339,428
29	Quarter-end value of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables (I)+(J)	10,089,952	11,940,722
14	Quarter-end value of gross SFT assets (I)	14,063,580	16,940,445
15	Quarter-end value of netted amounts of cash payables and cash receivables of gross SFT assets (J)	3,973,627	4,999,723
30	Total exposures (excluding the amount of the central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables) (K)	33,054,603	28,675,296
30a	Total exposures (including the amount of the central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables) (L)	36,061,901	31,616,908
31	Leverage ratio on a consolidated basis (excluding the amount of the central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables) (E)/(K)	4.89%	5.37%
31a	Leverage ratio on a consolidated basis (including the amount of the central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables) (E)/(L)	4.48%	4.87%

2. Reasons for significant differences in the consolidated leverage ratio over previous year

There is no significant difference in the consolidated leverage ratio over the previous year.

Overview of Main Features of Regulatory Capital Instruments

CCA :Main features of regulatory capital instruments

1	Issuer	Daiwa Securities Group Inc.
2	Unique identifier (e.g., CUSIP, ISIN or Bloomberg identifier for private placement)	NA
3	Governing law(s) of the instrument	Japanese Law
3a	Other TLAC-eligible instruments governed by foreign law	—
	Regulatory treatment	
4	Transitional Basel III rules	Common Equity Tier 1 capital
5	Post-transitional Basel III rules	Common Equity Tier 1 capital
6	Eligible at solo/group/group&solo	Daiwa Securities Group Inc.
7	Instrument type (types to be specified by each jurisdiction)	Common stock
8	Amount recognized in regulatory capital (Currency in millions, as of the most recent reporting date)	
	Consolidated Capital Adequacy Ratio	1,437,120 million Yen
9	Par value of instrument	—
10	Accounting classification	
	Consolidated balance sheets	Shareholders' equity
11	Original date of issuance	—
12	Perpetual or dated	NA
13	Original maturity date	—
14	Issuer call subject to prior supervisory approval	NA
15	Optional call date and redemption amount	—
	Contingent call dates and redemption amount	—
16	Subsequent call dates, if applicable	—
	Coupons / dividends	
17	Fixed or floating dividend/coupon	Floating
18	Coupon rate and any related index	—
19	Existence of a dividend stopper	NA
20	Fully discretionary, partially discretionary or mandatory	Fully discretionary
21	Existence of step up or other incentive to redeem	NA
22	Noncumulative or cumulative	NA
23	Convertible or non-convertible	NA
24	If convertible, conversion trigger(s)	—
25	If convertible, fully or partially	—
26	If convertible, conversion rate	—
27	If convertible, mandatory or optional conversion	—
28	If convertible, specify instrument type convertible into	—
29	If convertible, specify issuer of instrument it converts into	—
30	Write-down feature	NA
31	If write-down, write-down trigger(s)	—
32	If write-down, full or partial	—
33	If write-down, permanent or temporary	—
34	If temporary write-down, description of write-up mechanism	—
