# **Risk Management**

While Daiwa Securities Group pursues profitability and growth, it also recognizes the importance of appropriately identifying, evaluating, and effectively managing various risks associated with its business operations. The Group aims to continuously improve its corporate value by maintaining a sound financial base and profit structure that is balanced in terms of risks and returns, and by appropriately controlling risks that are likely to manifest over the medium to long term, in addition to short-term risks.

Message from the CEO

## **Risk Management System**

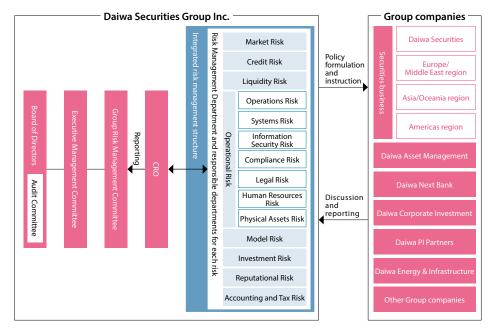

### Basic policies as defined by the Rules for Risk Management at Daiwa Securities Group

- 1 Management's proactive involvement in risk management.
- 2 The structure of a risk management system that responds to features of the risks held by the Group.
- 3 Understand overall risk based on integrated risk management, secure strong capital and the soundness of liquidity.
- 4 Clarify the risk management process.

Each Group company conducts risk management suited to the risk profile and size of its business in accordance with the basic policies related to risk management. The Risk Management Department within Daiwa Securities Group Inc. and responsible departments for each risk monitor the risk management systems and risk status of Group companies. The risk status of Group companies grasped through such monitoring, as well as their risk management issues, is reported to the CRO, who is appointed from among corporate executive officers, as necessary. The CRO gives directions to address the risk management system, risk status, and other issues for each company, verifies the performance of risk management systems, and conducts reviews if necessary according to the business scale, characteristics, and risk status of each company. The CRO is in charge of reporting risk to the CEO, and does not concurrently serve as the officer in charge of internal audits or as a member of the Audit Committee.

The risk status and other issues of Group companies are reported to the Group Risk Management Committee, a subcommittee of the Daiwa Securities Group Inc. Executive Management Committee. This committee deliberates and decides on policies for risk management and specific measures. The Group Risk Management Committee also deliberates and revises the risk management process. This committee is comprised separately from the Audit Committee, and also reports on the details of its discussions to the Audit Committee.

## Risk Management System-

## ■ Risk Appetite Framework

International financial institutions are increasingly required to exhibit sufficient soundness to operate their functions as financial intermediaries during times of economic and market stress. In addition, the Group is required to ensure it has sufficient liquidity and equity capital commensurate with these risks in order to be adequately prepared during times of stress.

Under this environment, the Group has introduced a risk appetite framework (RAF). The Group has documented this framework in its Risk Appetite Statement, which the Board of Directors has deliberated and decided on, and is working to spread this Groupwide while raising the level of its management system.

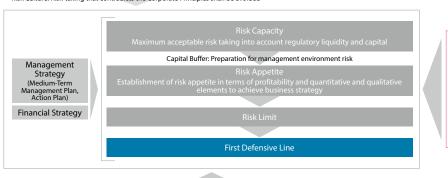

The quantitative risk appetite index is a topic of discussion and determination by the Board of Directors as part of the Risk Appetite Statement and reviewed twice a year.

Moreover, RAF-related audits of the Board of Directors and management business execution are conducted by the Audit Committee.

#### RAF Concept Chart-

Risk Culture: Risk-taking that contradicts the Corporate Principles shall be avoided

Governance System / Management Information System

## ■ Integrated Risk Management

Integrated risk management is a risk management approach that aims to ensure management safety while continually improving corporate value by identifying all risks faced by the Group and comparing them to management strengths. When engaging in integrated risk management, we measure the impact on capital and liquidity within the Group from a forward looking perspective and utilize RAF-based stress tests\*1 as well as Top Risk management\*<sup>2</sup> as part of our efforts to ensure a comprehensive understanding of risk.

<sup>\*2</sup> To select and manage risk events that require particular attention in light of the Group's business characteristics.

# **Compliance**

Message from the CEO

Assessment by internal audits

Social Role:

### Fostering compliance awareness

Daiwa Securities Group rigorously observes regulations and exercises self-discipline so that it can contribute to the sustainable growth of society while maintaining high ethical standards. We conduct training programs for new graduates when they join the Group, and continue through regularly scheduled training sessions throughout their careers, thus ensuring that every employee is aware of, and thoroughly understands, compliance issues.

The Group trains its employees so that even when the Group pursues new business ventures in areas where the regulatory structure is incomplete, they can return to the basic approach of laws and regulations, act sincerely in light of socially accepted ideas and common sense, and maintain strong self-discipline and legal awareness.

As basic standards in areas that should be fulfilled at a bare minimum, the Group has formulated Group Minimum Standards with respect to the prevention of insider trading, elimination of anti-social forces, and information security. Based on these standards, the Group aims to achieve a level of compliance awareness.

# **Compliance system**

The Group is improving and strengthening the Group-wide compliance system through the combined efforts of the Compliance Control Department, which is responsible for overall compliance planning and formulation, and which serves as a market gatekeeper, and Compliance Department (I) and Compliance Department (II), which are tasked with providing direction and support to the sales branches and headquarters departments and divisions. Moreover, in an effort to prevent legal and regulatory violations, these departments cooperate with internal administrators assigned to each department in regard to monitoring, guidance, and educational activities that ensure operations are conducted properly. These departments also work closely with the compliance departments at overseas Group companies in order to build a global compliance system.

The Group Compliance Committee deliberates and decides general policies and specific measures on matters involving compliance with laws and regulations, establishment of corporate ethics, and internal control for the Group.

Recognizing that insider trading risks, deficiencies in money laundering and terrorist financing countermeasures, information security risks, and improper conduct by the Group's officers and employees all represent key risk areas, we are working to strengthen our management framework.

<sup>\*1</sup> Stress tests are used for the integrated evaluation of impacts on capital, liquidity, and business systems based on probable stress scenarios that may have a major impact on the Group.
